# CMSC436 Milestone 3: DineIn

## Project Team 1

- Nam Tran
- Quan Ha
- Jose Valdivia
- Yazeed Alhudhaif

## App Description

DineIn is a revolutionary online booking platform that simplifies the process of restaurant reservations, embarking customers to a new level of dining experience.

The app will allow users to reserve, view, and manage the information about their seats at the restaurant, offering a list of restaurants and an interface for booking or unbooking spots. The restaurant's admin users, on the other hand, will be able to view, manage, and post detailed information about their reservations and other information.

## Accomplished Goals

- Reserve feature
- Search feature
- Owners feature (replace mock data with real data)

## Updated Project Timeline

### Milestone 1 (Completed)

- Login page
- Home page - List of restaurants
- Profile page (Previously Milestone 3)
- Mock Data

### Milestone 2 (Completed)

- Setting up database + authentication
- Restaurant information
- Wishlist page

## Milestone 3  (Completed)

- Reserve feature
- Search feature
- Owners feature (replace mock data with real data)

## Final Submission

Completed all minimal goals, at least 3 stretch goals, project submitted, and a demonstration of the app scheduled.
